

LIFE SCIENCE & HEALTH CARE  
CONSULTING

## INOSOLVE

Our highly qualified and active INOSOLVE team specializes in advising and supporting pharmaceutical, biotechnological and medical device companies, as well as pharmacies and hospitals, in Good Manufacturing Practice (GMP), Good Laboratory Practice (GLP), Good Clinical Practice (GCP), Good Distribution Practice (GDP), and a variety of ISO standards.

Our consultants have a strong instinct for coordination and organization and are systematically assigned according to the needs of the respective customer and project. Our motivated and committed employees in each specialist field are a key factor in our success.

- Life Science & Health Care Consulting
- Quality Management & Auditing
- Regulatory Compliance, Toxicology and R&D
- Qualification & Engineering
- Project Management

We combine professional consulting and service provision with project management. Creativity is the driving force behind everything we do. Our commitment to quality is the basis for efficient and reliable outcomes, and guarantees the long-term success of our projects and partners.

The INOSOLVE team is a group of highly qualified, committed specialists whose goal is to identify innovative strategies and solutions for your company.

Thanks to our broad range of specialist competencies and many years' experience in the industry, we are able to draw from an enormous pool of knowledge.

With interdisciplinary teamwork and an integrated approach, we offer a systematic and integral overview of your company.

We always work in accordance with current guidelines and standards.

We support companies in overcoming challenges and ensuring its long-term success.
