## Austrian family business

**Close to our customers worldwide**

A grayscale world map is shown with a grid of latitude and longitude lines. Concentric white circles are centered over Europe, with a small blue circle at the center containing the Plasser & Theurer logo. A dark blue horizontal bar is positioned in the lower right quadrant of the map.

**Close to our customers worldwide**

**Close to our customers worldwide**

- **ENR purchased the first Track Maintenance Machine from Plasser & Theurer in April 1959**
- **ENR operates tamping machines for plain track and switches, ballast regulating machines, ballast cleaning machines and a track recording car.**

**Why does ENR ( a railway) need these different types of machines?**

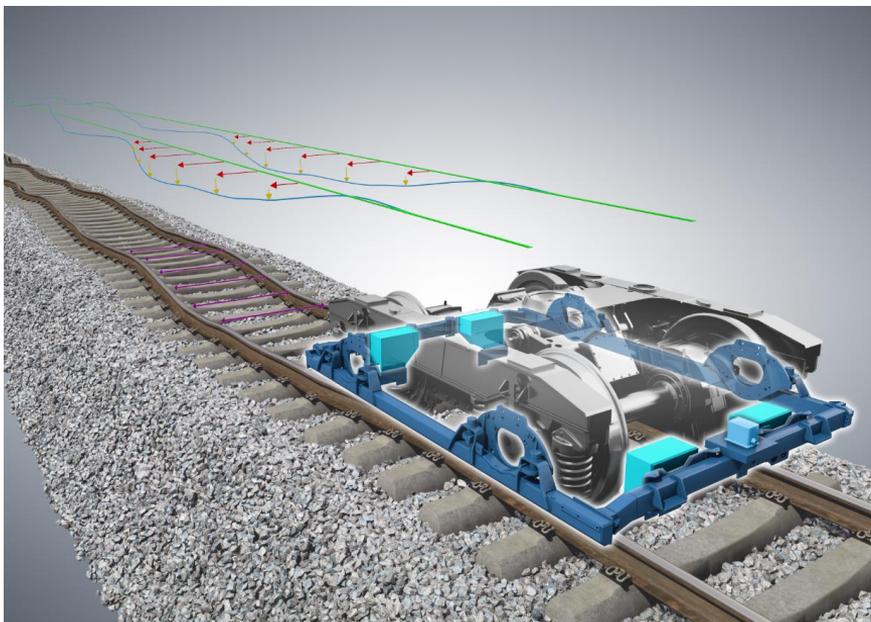

# Everything is about **track geometry!**

# What happens with the track geometry over the time?

# The first machine that is needed to check the track geometry is the Track Recording Car!

7013-SV-DOKU-025124-01628866

# Only full-range supplier for all work sequences
