

# **NEXT GENERATION eID**

## ID-Austria following the user's needs

- Austria to promote a **MOBILE FIRST** strategy during the last EU presidency of Austria
- ... as a result of the **practical experience** when offering both card based and mobile phone based eID services for free
- ... taking into account that card readers are an external component and have the need of specific software installation still being **decreasingly supported by browsers**

## how to bring **BIG PLAYERS** on board

- **big US players not acting EU friendly**
  - QWACS
  - eIDAS & Cloud (depolying and use)
- **DIGITAL SOUVERIGNTY ASKING FOR MORE**
  - DNSSEC
  - Liability for eID – **without then need for explicit contracts**

## ATTRIBUTES THE NEXT STEP

- **electronic driving licence**
  - Legally accepted
  - Model for all sorts of documents
  
- **eIDAS<sup>new</sup> standards for attributes**
  - WALLET
  - Interoperability via standards
  - **online and OFFLINE use**

## Next generation eID

**Active contribution  
to European views**

**EU  
eIDAS**

**STANDARDIZED  
ATTRIBUTES**

**SECURE ONLINE  
AND OFFLINE USE  
(WALLET..eIDAS 2)**

**AUSTRIA – the first member state  
to notify mobile eID at level HIGH**

## Next generation eID

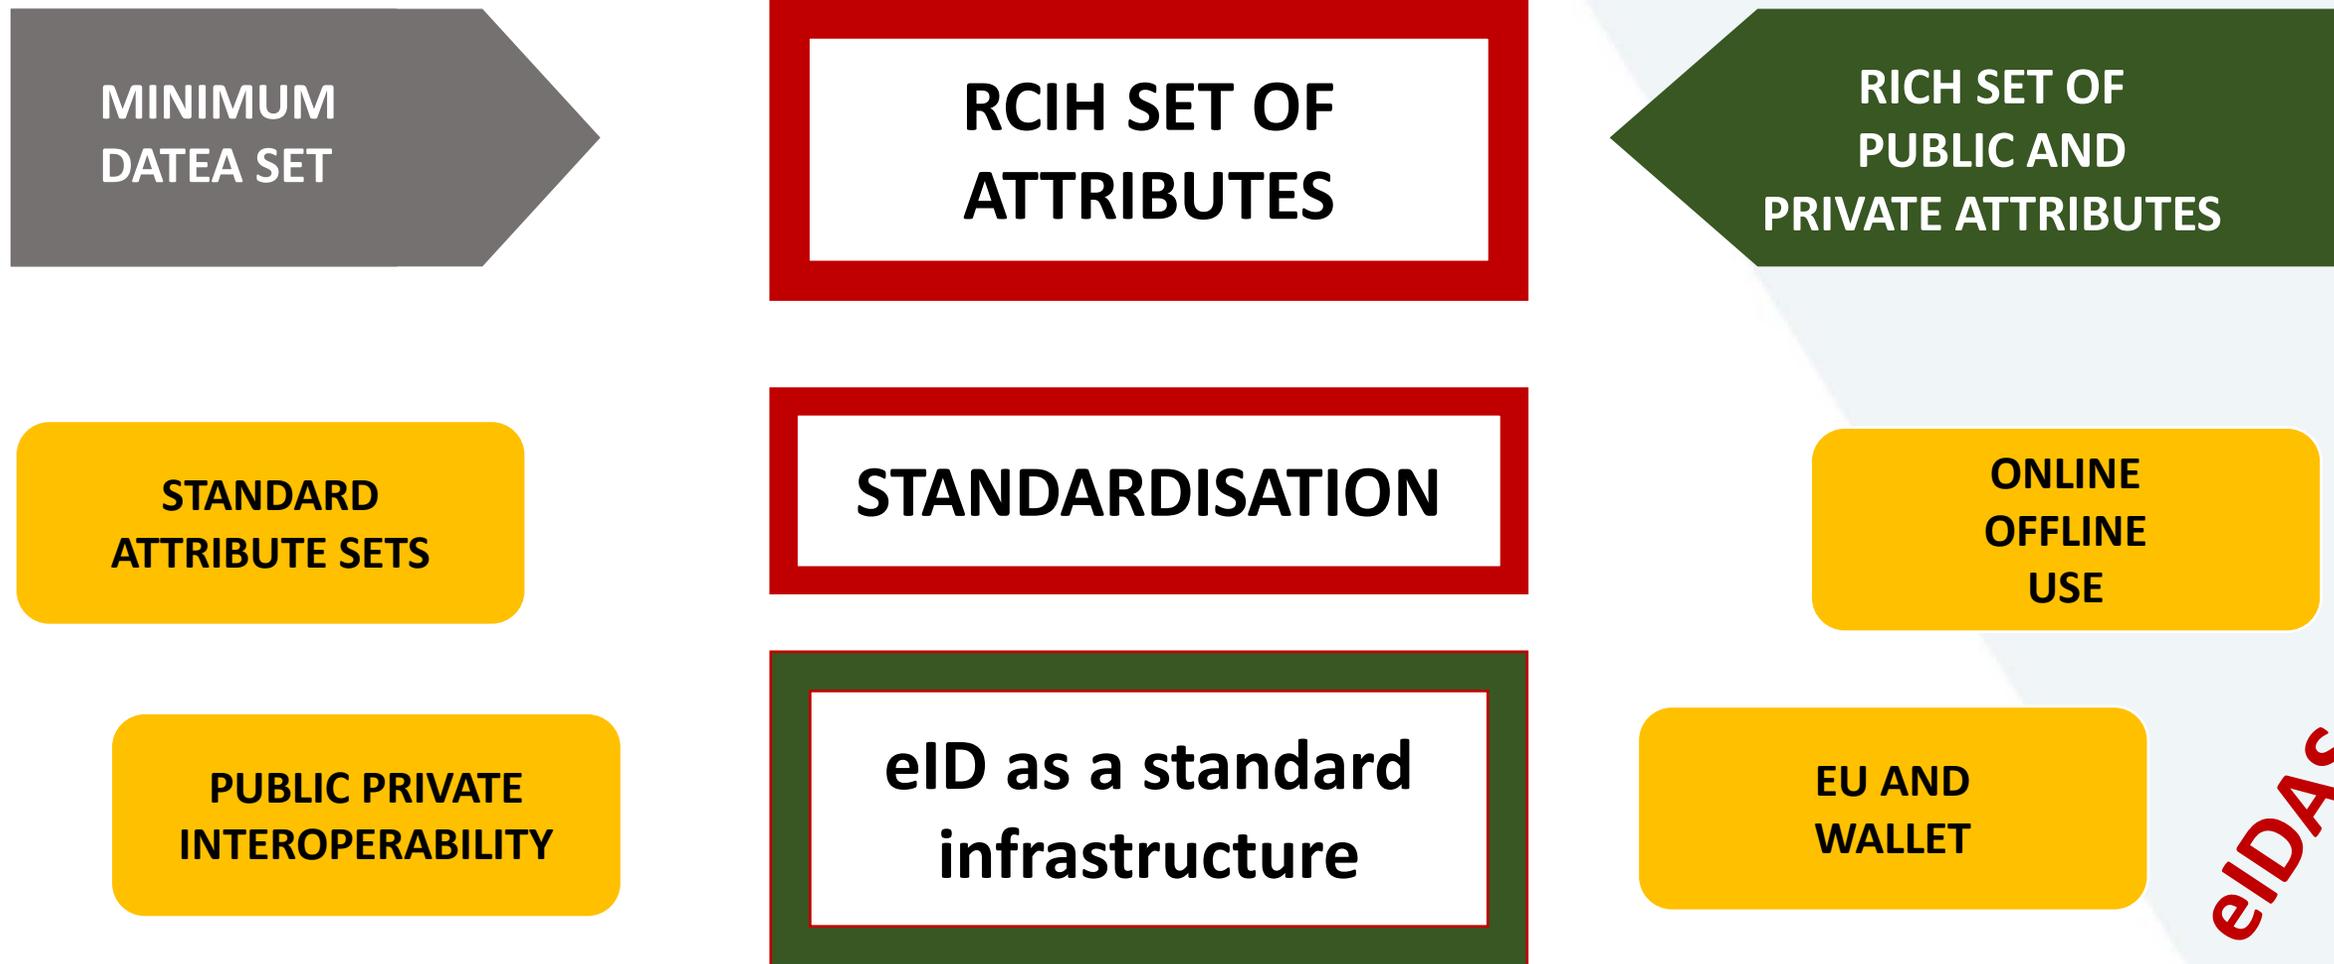

**PRIVATE USE**  
(very high frequency)

**USE WITH ADMINISTRATION**  
well assigned liability

profiting from  
synergies

**MAINTAINING SECURITY**  
**ENABLING LIABILITY**

## eID – QUO VADIS
